

RCTQ-2162-FM

The AlanDick RCTQ-2162-FM is a 1 5/8" EIA – 7/8" EIA 6 Exit Coaxial Power Divider. All parts are manufactured using the highest quality corrosion resistant materials and are designed for many years of reliable trouble-free operation. The RCTQ-2162-FM is designed to be pressurized with dry air in order to prevent moisture condensation and the resultant degradation in electrical performance.

Example Picture

| Product Specification | | |
|-------------------------|--------|--------------|
| Frequency Range | (MHz) | 88 - 108 |
| Return Loss | (dB) | <-30 |
| Number of Ways | | 6 |
| Input Impedance | (ohms) | 50 |
| Max Power @ 98MHz | (kW) | 17.8 |
| Max Voltage | (kV) | 4.89 |
| Construction | | Brass/Copper |
| Input Connector | | 1 5/8" EIA |
| Output Connectors | | 7/8" EIA |
| Pressurisation Required | | Yes |
